

Statistical profile - Lebanon

This profile is an extract from the database fed by the regular statistical data exchanges between the Mediterranean partner countries and Eurostat within the framework of MEDSTAT II.

This data exchange covers the following sectors:

Agriculture, External Trade of goods and services, National Accounts, Energy, Environment, Social Statistics, Tourism, Transport.

All the data sources used are national. The collected data were submitted to quality controls at both country and MEDSTAT II levels. Methodologies are comparable with the European standards.

More detailed statistics are available in the New Cronos and Comext databases from Eurostat and in the statistical databases of each Mediterranean partner country.

The methodologies used for the production of these different figures can be found in the "Euro-Mediterranean Statistics" publications which are available on the website of the program to the following address: <http://ec.europa.eu/eurostat/medstat>, section publications/documentation.
